The graph displays four data series over 125 segments. BW-M (blue) and BW-P (orange) show high variability, peaking near 2800 Kbps around segment 25. BW-R (purple) follows a similar trend but with lower peaks. Bitrate (green) is mostly flat at 1000 Kbps, with sharp drops to near 0 Kbps at segments 5, 40, and 50, and a step-wise increase to 1500 Kbps by segment 100.
